

## THE ROOT CONNECTION (425) 881 1006 2019 TOMATO PLANT LIST

All our tomatoes are early disease resistant varieties and have been trialed in our fields. We grow all our tomatoes from seed without artificial heat. We use no pesticides, fungicides or growth stimulants. All varieties are Non-GMO. This makes the plants healthier and will acclimate better to life outdoors. Each pot is fertilized with Walt's Organic Fertilizer (available for purchase here) and we recommend this for all vegetables.

\*\*\*\*Planting in pots?\*\*\*\* any tomato can grow in a pot, but the Indeterminates require at least a 7-10 gallon pot and something to climb on. For smaller 3 or 5 gallon pots, use a Determinate variety.

### INDETERMINATES vining type needs trellis or other support

- Goliath** Large smooth red tomato. Ripens after Early Girl and Giant. Beefsteak type. Avg size 8-10 Oz.
- Jet Setter** Very vigorous early medium size red. **Sub for Early Goliath** (no longer available). Avg size 6 oz.
- Early Girl** **Very early** regional favorite, appreciated for its reliability and tart flavor. Avg. size 6 oz.
- Giant** **Very early** large slicer **Winner of our employee taste test!** Avg size 10-12 oz. **Highly recommended**
- Genuwine** A cross between Genovese and Brandywine heirlooms. Ripens earlier than regular Brandywine.
- La Roma** A very good producer of med to large paste tomatoes. Good disease resistance.

### CHERRY TOMATO VARIETIES:

- Sweet 100** Clusters of very sweet red cherry tomatoes. A regional favorite for reliability
- Sungold** A flavor champion! Tomatoes ripen to a bright orange and have a unique fruity flavor.
- Sunsugar** **NEW for 2019** Wow! Indeterminate **yellow-orange cherry**. Very sweet- limited quantities
- Esterina** Delicious cherry tomato ripens yellow with an orange blush. **Try a kaleidoscope of yellow, orange and red cherry tomato plants!**
- Yellow Pear** Vigorous vine produces clusters of small yellow pear-shaped tomatoes. Mild flavor.
- Sunny Goliath** Medium size dark yellow slicing tomatoes. Low acid for those who like yellow tomatoes.
- Terenzo** Hanging basket with nasturtiums. **Limited quantities.** Very early large red cherry tomatoes.  
**Nasturtiums flowers and leaves are edible- delicious and colorful in a salad!**

**DETERMINATE TYPES** – determinates produce more of a concentrated crop. **Suited for pot containers** (for best results, use a 5 gallon or larger pot) or plant in the garden. Use cages or short stakes.

- Siletz** **Very early** Small plants for pots or garden. Big tomatoes with a beefsteak flavor.
- Bush Early Girl** Same great Early Girl taste in a **semi-bush** form. (Will need some support)
- Bush Goliath** Short stout beefsteak type. Good in pots. Great taste
- Husky Cherry Red** Short stout plant with a good crop of red cherry tomatoes. Good in pots, early.
- Tomatillo** Toma Verde variety. Med-early variety semi bush (will need a cage). For best pollination it is recommended to plant two together.
